Product specification

Machine dimension	530mm(W) x 556mm(H) x 433mm(D)	Power requirements	AC 100~240V 50/60Hz
Table size	233mm(X)x193mm(Y)	Weight	46Kg
Maximum cutting size	330mm(X) x 206mm(Y) x 75.5mm(Z)	Operation temperature	5° C to 40° C
Maximum feed rate	48mm / sec	Operation humidity	35% to 80%
Mechanical resolution	(XY)0.005mm / (Z)0.00125mm (A)0.028125degree	Instruction system	HPGL, G-Code
Spindle motor	Brushless DC, Max. 70w	Interface	USB
Spindle resolution speed	23,000 RPM	System and software requirement	CPU: Pentium®4 processor or faster recommended RAM: 512 MB Recommended OS: Windows®XP, Windows Vista™, Windows 7, Windows 8, Windows 10
Tool chuck	4mm Set screw		
	6mm Collet chuck (Optional)		

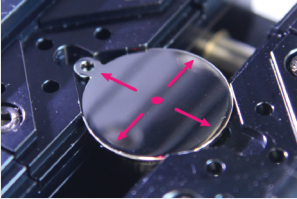

NAME JEWELRY SOLUTION II

UT Technology's new innovative name jewelry cutting & engraving machine can increase production, profit and decrease waste.

1

Automatic laser surface tracing system

Laser guide to position image on work space before cutting or engraving

2

Auto - Vacuum & Coolant switch

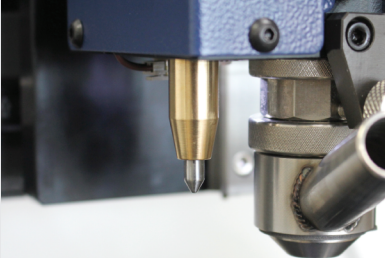

- Powerful vacuum collects loose debris and the coolant pump lubricates the blades for longer duration
- Collection chamber separates coolant and debris for future recovery

3

Auto surface sensing probe

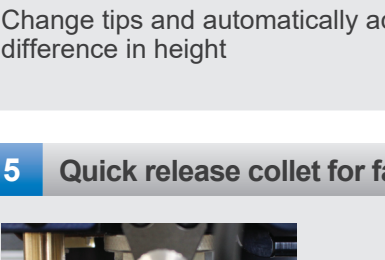

To ensure uniform depth when cutting or engraving on uneven surface

4

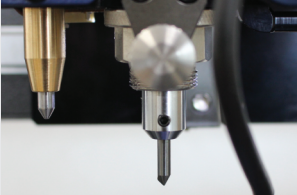

Automatic z-point positioning unit

Change tips and automatically adjust the difference in height

5

Quick release collet for fast tip exchange

6

Emergency Stop button

7

Variable speed controller

User can manually adjust the spindle speed during operation

8

Larger graphic LCD screen

Built in control panel with LCD screen

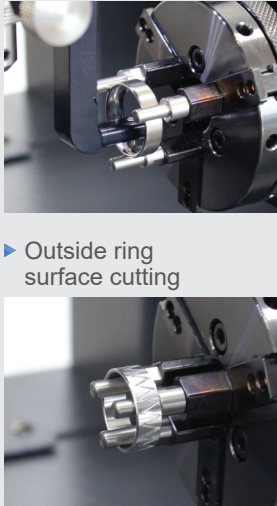

9

Ring indexing system

▶ Inside ring engraving

▶ Outside ring engraving

▶ Outside ring surface cutting

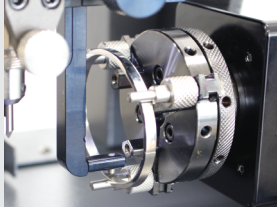

10

Bangle

▶ Inside bangle engraving

▶ Outside bangle engraving

11

Multipurpose jewelers jig / vise

Designed to hold securely without damaging variety of shapes and size pendants, bracelets, watches, and etc...

▶ Cut out name jewelry

▶ Curve out wax models

▶ Engrave on pendants
